WHO WE ARE

Diversity Model Agency officially is founded in 2018. Founder Sensemielja Letitia Sumter is a international model who has saw the highs and lows in the industry and therefore gained a lot of experience. A new idea was born and we united forces to hereby inspire others the importancy of a diverse and inclusive representation. Not only in front of the scenes but also behind the scenes.

Diversity is not new but has been there from the beginning of humanity. Nevertheless, we now seem through all the changes in the society to become more aware of diversity and also its value to understand this. A social issue such as the pursuit of diversity should certainly not be seen as hype. The only advantage of a hype is that it attracts a lot of attention and therefore a topic is given the space to create awareness

WHAT WE DO

Alongside our work in successfully placing talent in paid work opportunities, we also built a real community. We offer regular workshops, as well as running our own campaigns, catwalk shows and socials. These opportunities ensure that our talent increase their confidence and skills, ensuring that they can deliver on set.
